## MANOW NOWHERE

Manow Nowhere (Pacharaman Korppai-boon) is a Thai contemporary artist born in 2000, based in Bangkok. She graduated from KMITL University with a degree in Painting and is known for crafting surreal, character-driven works that begin life in 3D software before being meticulously transformed into dream-like paintings. Her art is a celebration of freedom, imagination, and storytelling.

In her paintings, the character Manow journeys through fantastical landscapes inspired by her favorite films and experiences a colourful and borderless world, often accompanied by her loyal sidekick Bambii.

“This show is a glimpse into a character’s inner world where imagination blends with reality, and ordinary moments slip into the surreal” says the artist. “These artworks capture the quiet adventures and in between spaces, inviting us to wander somewhere not far, just...elsewhere.

‘Elsewhere’ bridges reality and fantasy with a tone that’s at once personal and universally resonant. Each piece capturing the wonder of escapism while subtly commenting on individuality and freedom of expression. It’s a visual diary for the curious, the dreamers and those searching for something just beyond the surface.

Though rooted in personal reflection, ‘Elsewhere’ resists the sort of introspection that feels heavy. There’s a gentle humour and warmth throughout the work - a sense that even in moments of stillness or uncertainty, there is joy to be found in simply observing, drifting and imagining.

In Manow’s world, even the quietest scenes carry a spark of playfulness, reminding us that imagination is a refuge always within reach.
